## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Neither the specification nor the claims define the terminology "smart material". For examination purposes the Examiner assumes a piezoelectric material as a smart material.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "smart material" is not defined and therefore renders the claim indefinite.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2834

6. Claims 1, 15, 23 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 6137208 to Hoffmann et al (hereinafter Hoffmann).

Hoffmann discloses a device and method for driving a capacitive actuator comprising a piezoelectric actuator (P); a control circuit (ST); switches (X1-X4); coil (L); diodes (D).

7. Claims 1, 11, 12, 15-23 and 33-42 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 0122502A to Schrod.

Schrod discloses the method and circuit for driving a capacitive actuator comprising: a capacitive actuator (P1); a voltage controlled DC/DC converter for operating the actuator; and a switch circuit for charging/discharging the actuator in response to connection/removal to the power source.

8. Claims 1-14, 15-28 and 33-42 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4625137 to Tomono (hereinafter, Tomono).

Tomono discloses an apparatus comprising: a piezoelectric actuator (1); a controllable power source (2, 4, 5 and  $E_c$ ); a switching circuitry (3); a DC/DC converter (Column 5, lines 41-45) having a transformer (TR) including primary and secondary windings (11, 12 and 13); and a diode (ZD1).

With regards to claim 14, Tomono discloses the invention except for the transformer being a LTCC design. The method of forming the device is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

Art Unit: 2834

***Allowable Subject Matter***

9. Claim 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Double Patenting***

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 1-42 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of copending Application No. 10/621,797. Although the conflicting claims are not identical, they are not patentably distinct from each other because the applicants are claiming the same circuits and limitations in different wording.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Conclusion***

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
